## SPRING MAINTENANCE

As the weather warms up, it is a good time to check your home for damage after winter.

1. Check your drainage slope and make sure the ground slopes away from your foundation--so rainwater does not flow into your basement.
2. Inspect your roof. When it's safe to climb onto the roof, look for damp spots or cracks in the shingles that may need to be repaired.
3. Have your central air conditioner professionally serviced.
4. Clean and sharpen garden tools and get your mower blades sharpened.
5. Recaulk around your doors and windows, and repair the glazing around exterior windows.
